Our Production of Anibedding Aspen and Poplar Shavings

We use the highest quality of excorticated trunk wood of the aspen tree and poplar tree. Our aspen wood is obtained from sustainably cultivated forests in the Baltic states, while the poplar wood is procured from domestic forests in Northwest Germany.

Our production sites:

- ✎ The first production site belongs to the AsBe-wood GmbH and is located near Oldenburg in Northern Germany. Here, we produce aspen as well as poplar animal beddings.
- ✎ The second production site belongs to one of our partner in Northern Germany near the Danish border,
- ✎ The third production site belongs to our partner in Germany, and is located in State of Brandenburg. Here we produce our Anibedding Shaving.

The variety of production sites allows us to guarantee, in any event, a delivery of our product.

Your Team of the AsBe-wood GmbH
